

271.01 River and Sea Transport (Navigation and control of sea vessels)

Provides theoretical and practical training of qualified personnel who would acquire basic professional knowledge to perform professional tasks and responsibilities of an applied nature in the specialty, ability to industrial and scientific activities.

After mastering the specialty 271.01 River and Sea Transport (Navigation and control of sea vessels), the graduate will be able to work as:

- Captain Assistant;
- Second Captain Assistant;
- Senior Captain Assistant;
- Captain;
- Captain- Engineer (specialization “River transport”);
- Navigator;
- Port Captain;
- Captain-mentor.

For every sailor, sooner or later, there comes a time when he decides to go ashore. Training in navigation removes all questions about further income - your knowledge and skills (along with vast experience) are enough to work “on land” in the following positions:

- Consultant-mentor;
- Superintendent;
- Surveyor of a shipping company.
